

OREGON TECH

Standing Committees, Commissions, and Councils (2018-19)

Preamble

Education requires the oversight and management of a multitude of tasks and assignments. Shared governance at an educational institution offers the opportunity for faculty and staff to assist administrators with those tasks by providing input, recommending outcomes, and participating in operational decisions. In addition to committees appointed directly by the Faculty Senate and *ad hoc* committees created for special purposes, the Oregon Institute of Technology recognizes a number of standing committees, commissions, and councils that provide continuous support for academic leadership. These committees report to the Vice Presidents and Associate Vice Presidents of various constituencies. These administrators recommend membership and service on the committees reporting to them to the President for approval. Recommendations for membership and service on the committees reporting to Faculty Senate are made to the President of the Faculty Senate for approval.

Two types of appointment are recognized: 1) position on a committee because of job title or position (e.g., Department Chair on Academic Council); and 2) a member selected for a rotating term. In most cases, terms are intended for three-year intervals. Members may be reappointed for an additional three-year term (six years total), but it is the intention of this process to encourage broad participation and to allow faculty and staff to bring fresh perspectives and skills to their committee assignments. This is deemed especially critical for high profile assignments that impact promotion and tenure decisions. Members can be reappointed after a term off the committee.

Individuals can request consideration for membership on a particular committee at any time by petitioning the Provost or President of the Faculty Senate, for the committees reporting to administrators and Faculty Senate, respectively. The Office of the Provost will affirm membership and notify appointees for the succeeding academic year before the end of the spring term, allowing faculty and staff to know their respective assignments before returning in the fall. Appointed members have staggered terms so that some membership continuity is present.

The academic community recognizes the importance of committee assignments and the role it plays in shared governance. However, committees that are unwieldy in size often have difficulty in meeting or reaching a quorum. Members who are regularly absent can be removed from a committee at the request of the committee Chair to the appropriate reporting executive. Likewise, a Chair who is deemed inefficient and unable to organize committee business can be removed at the request of committee members to the appropriate reporting executive. Assignment to a committee should be regarded as a privilege and responsibility.
