

2016-17 Program Assessment Report

Operations Management B.S.

Mission, Objectives & Learning Outcomes

Oregon Tech Mission

Oregon Institute of Technology, an Oregon public university, offers innovative and rigorous applied degree programs in the areas of engineering, engineering technologies, health technologies, management, and the arts and sciences. To foster student and graduate success, the university provides an intimate, hands-on learning environment, focusing on application of theory to practice. Oregon Tech offers statewide educational opportunities for the emerging needs of Oregonians and provides information and technical expertise to state, national and international constituents.

Core Theme 1: Applied Degree Programs

Oregon Tech offers innovative and rigorous applied degree programs. The teaching and learning model at Oregon Tech prepares students to apply the knowledge gained in the classroom to the workplace.

Core Theme 2: Student and Graduate Success

Oregon Tech fosters student and graduate success by providing an intimate, hands-on learning environment, which focuses on application of theory to practice. The teaching and support services facilitate students' personal and academic development.

Core Theme 3: Statewide Educational Opportunities

Oregon Tech offers statewide educational opportunities for the emerging needs of Oregon's citizens. To accomplish this, Oregon Tech provides innovative and rigorous applied degree programs to students across the state of Oregon, including high-school programs, online degree programs, and partnership agreements with community colleges and universities.

Core Theme 4: Public Service

Oregon Tech will share information and technical expertise to state, national, and international constituents.

Program Alignment to Oregon Tech Mission and Core Themes

Oregon Tech's Management programs are designed to develop business professionals by combining a strong business core with hands-on projects. The Operations Management program provides students with a strong managerial and applied problem-solving background. Industry experienced instructors work closely in small, focused classes that prepare students to address issues related to productivity, management, quality assurance, and operations logistics.

Program Mission

The Operations Management degree, a Bachelor of Science program, prepares students for leadership positions in the production and service industries.

Program Educational Objectives

- The Operations Management degree program prepares students for graduate school programs such as the MBA or the MIM.
- The Operations Management degree program prepares students for supervisory positions in organizations, including for-profit organizations, non-profit organizations, and government organizations.
- The Operations Management degree program prepares students for M.A.T. programs and future careers in high school education.
- The Operations Management degree program develops skills in problem solving, project
 management, communication, and managing effectively in team-based work environments, and
 prepares students for employment within a wide variety of service and product industries.

Program Faculty Review

Program Student Learning Outcomes and Objectives were reviewed by program faculty during Fall Convocation Program Assessment Meeting.

Department and program outcomes were reviewed by faculty during September 2016. During the 2016-17 academic year, the department significantly reviewed the core business outcomes. Additionally, faculty also simplified department assessment assignments to better focus efforts. Two assignments - senior project and the case study - will now assess all department outcomes. No changes were made in the program learning outcomes.

Showcase Learning Opportunities

Other learning opportunities include:

- Students can earn a green belt certification in Six Sigma and lean management methods
- Industry internships prior to senior project experience
- Professional development skills workshops
- Hands-on community projects incorporated into program courses
- Senior project an integrated capstone experience that requires project management, research and analysis to develop a solution for an actual business problem

Program History & Vision

Program History

The Operations Management degree at Oregon Tech has undergone several iterations in recent decades. Oregon Tech originally offered an Industrial Management degree; this degree evolved in the mid-1990s into an Industrial Engineering degree which was accredited by ABET. Oregon Tech hoped to increase enrollment with these changes. Enrollment, however, dropped dramatically as students were not interested in an engineering emphasis. In 2002 the curriculum was revised, the ABET accreditation was dropped, and the degree name was changed to Operations Management. Today, the Operations Management program is transfer- friendly, preparing students for leadership positions in the production

and service industries. Curriculum enhancements for the 2014-2015 academic year were rolled out in the 2015-2016 academic year include the new course sequence that offers courses in Materials Management, Logistics Management and Quality Management. This sequence brings additional depth to the Operations Management degree program.

Meeting with Advisory Board

Program faculty held a meeting with their Advisory Board during the academic year.

Advisory Board Review

The Advisory Board reviewed the Program Mission and Objectives during the academic year.

On November 2, 2016, the advisory board met with program faculty. The 2015-16 department and program assessment results were reviewed with the board. Overall, the results showed improvement in several areas of senior project. While last year we had six department level assessments, as a group we found this amount of data was not helpful in determining how to make improvements. Therefore, beginning in 2016-17, we will be simplifying our plan and only assessing senior project and the strategic case study for the department level. The board supported this change. Additionally, the faculty shared the results from the business core update. The board supported proposed changes of the business core to maintain skills and knowledge that today's employers are seeking.

Program Enrollment

The Operations Management degree is offered at the Klamath Falls, Wilsonville and Online. Enrollment for the 2016-17 year was 70 students. This represents a 15% increase in the last five years.

Attachment 1_Enrollment_5_Year_History_by_Major

Program Graduates

Eighteen (18) students graduated with a degree in OM in June of 2016. The graduation is consistent with issues noted in program enrollment.

Attachment 2_Graduates_10_Year_History_by_Major

Employment Rates and Salaries

Based on data from the last three years, 83% are employed (employers include Intel, Salesforce, Boeing, Alaska Industrial Hardware, Blazer Industries) and 14% have continued their education. Reported starting salaries average \$63,000.

Closing the Loop

Describe any actions taken and re-assessment done during this academic year in response to assessment findings from prior academic years.

Program Faculty implemented actions during the academic year based on assessment findings from previous assessment cycles.

We have gathered assessment data following changes that indicates improvement in student learning.

We have gathered assessment data following changes that indicated further action is needed.

Changes Implemented

Case Study & Senior Project: During the 2016-17 academic year, the department streamlined assessment efforts focusing on the BUS478 Strategic Management Case Study and Senior Project. This focused assessment effort allowed faculty to work on area that needed improvement. For example, students had difficulty analyzing research to develop solutions in senior project. Therefore, faculty were able to concentrate on these areas. In addition, students were required to focus project using skills and knowledge learned in major.

Student Exit Survey: The main goal of the senior exit survey is to assess confidence and satisfaction rates of the program. The previous year's survey, students are asked how the management department has prepared them regarding each specific SLOs and PSLOs. This year we changed the question to ask students to rate their proficiency regarding with each specific SLO and PSLO. This question focuses more on students' ability rather than their satisfaction with faculty. Note that separate questions have been included regarding faculty and advising.

Program Student Learning Outcomes: No changes made to outcomes.

Assessment Findings

Case Study

- Identify which facet(s) of case study may be dragging down the assessment score.
- Ensure senior project proposals address these assessments criteria for case study criteria at the outset of the senior project

Senior Project

- Ensure alignment of project objective and conclusion across the life the project
- Institute regular tollgate or milestone meetings over the life of the project to ensure project progress and therefore more proficient project summary and conclusion as the close of the project.

Fundamental Concepts of Operations Management

• Ensure senior projects capture elements of operations (capacity planning, inventory management, logistics, etc.) in the project charter, at the outset of the project.

Lean Management

• These results are a bit too good. All students used the same course project data, perhaps resulting in over-collaboration. Next assessment cycle students will all receive different and unique data for their course project.

Department Student Learning Outcomes Assessment Cycle

| DEPARTMENT STUDENT LEARNING OUTCOMES Yearly Cycle Management Department | 2016-17 |
|---|---|
| OIT-MGT 2016-17.1 Communicate the major concepts in the functional areas of accounting, marketing, finance, information technology, and management. | BUS 478 BUS 497 Student Exit Survey |
| OIT-MGT 2016-17.2 Describe the legal, social, ethical, and economic environments of business in a global context. | BUS 478 BUS 497 Student Exit Survey |

Assessment Map & Measure

- F Foundation introduction of the learning outcome, typically at the lower-division level,
- P Practicing reinforcement and elaboration of the learning outcome, or
- C Capstone demonstration of the learning outcome at the target level for the degree

For each outcome, programs should identify at least 2 direct measures (student work that provides evidence of their knowledge and skills), and 1 indirect measure (student self-assessment of their knowledge and skills) for each outcome.

For every program, data from the Student Exit Survey will be an indirect measure at the capstone level.

Office of Academic Excellence

The following data represents majors declared by student as of Fall 4th week. Students with multiple/dual majors have been reported under each major in which they enrolled; therefore the student headcount will be duplicated. A small number of students that declared a third major have now been included in this report. Data reported is combined for all levels and all locations.
