

Echocardiography B.S. Degree Completion

Section 1- Program Mission, Objectives & Learning Outcomes

Oregon Tech Mission

Oregon Institute of Technology, an Oregon public university, offers innovative and rigorous applied degree programs in the areas of engineering, engineering technologies, health technologies, management, and the arts and sciences. To foster student and graduate success, the university provides an intimate, hands-on learning environment, focusing on application of theory to practice. Oregon Tech offers statewide educational opportunities for the emerging needs of Oregonians and provides information and technical expertise to state, national and international constituents.

Core Theme 1: Applied Degree Programs

Oregon Tech offers innovative and rigorous applied degree programs. The teaching and learning model at Oregon Tech prepare students to apply the knowledge gained in the classroom to the workplace.

Core Theme 2: Student and Graduate Success

Oregon Tech fosters student and graduate success by providing an intimate, hands-on learning environment, which focuses on application of theory to practice. The teaching and support services facilitate students' personal and academic development.

Core Theme 3: Statewide Educational Opportunities

Oregon Tech offers statewide educational opportunities for the emerging needs of Oregon's citizens. To accomplish this, Oregon Tech provides innovative and rigorous applied degree programs to students across the state of Oregon, including high-school programs, online degree programs, and partnership agreements with community colleges and universities.

Core Theme 4: Public Service

Oregon Tech will share information and technical expertise to state, national, and international constituents.

Program Alignment to Oregon Tech Mission and Core Themes

The OIT echocardiography degree completion program enables registered professionals in cardiac ultrasound to further their knowledge and skills necessary for career advancement, to become effective communicators, problem solvers, critical thinkers, responsible managers and leaders, and to value lifelong learning.

Program Mission

The Echocardiography Degree Completion bachelor's degree completion program enables registered professionals in cardiac ultrasound to further their knowledge and skills necessary for career advancement, to become effective communicators, problem solvers, critical thinkers, responsible managers and leaders, and to value lifelong learning.

Section 2: Program Description and History

The Echocardiography Degree Completion program was implemented in Fall 2003 as an online program. The program was originally developed at the request of students. Students who are accepted into the Echocardiography Degree Completion program are already registered Cardiac Sonographers working in the field who have passed their national registry exam in Cardiac Ultrasound. There have been well over 100 graduates to date, 92 in the last year alone and the program is in its 17th year. This program has seen steady growth since it started with more than 100 students currently enrolled, approx. 78 active students a quarter. On the student exit survey, 64% of the students said they “highly proficient” and 36% of students said there were “proficient” on the job as a result of this program. 100% of the online degree completion students in echo are employed. So, there is 100% success rate and median salary is \$65,000. The majority of students because they work are part time, taking 1-2 classes at a time.

Online	66	64	68	74	78
Full-Time	5	5	3	2	10
Part-Time	61	59	65	72	68

Survey Student Quotes from the Exit Surveys

- “I had observations on open heart surgeries which opened up my perspective in my field even more.”*
- “The courses have allowed me to grow in my professional development and have more confidence. “*
- “I am confident in my learning abilities and skills since doing online classes.”*
- “Education plays a major role in confidence.”*
- “I have a broader knowledge in management.”*
- “I feel I am now more prepared to become a manager.”*

Showcase Learning Opportunities

As stated above, the students in the degree completion programs are working licensed professionals already and are working toward completing their bachelors. There are many professional meetings but the one that most students attend is the Society for Echocardiography which was held last year in Portland, Oregon. Students get to participate in the scientific sessions and get to meet one another to develop a great learning community. Students get an opportunity to look at the latest equipment and hear scientific sessions in all areas of the field. This is a large internal meeting that brings physicians and technologists together in large numbers. In the lab management course, students are asked to interview experts in human resources, lab management, workplace discrimination policy and practice. In the externship course students publish professional case studies in scientific journals. Students are writing at an advanced level and improving their communication skills. Some go on to professionally publish case studies while still in this program.

Program Enrollment

The attached enrollment information is not separated out for the degree completion students. There are 78 active students in the degree completion program in the Fall of 2018-2019. See Appendix C.

Online	66	64	68	74	78
Full-Time	5	5	3	2	10
Part-Time	61	59	65	72	68

Table 2 Head Count

Program Graduates

The data below is not separated out for the degree completion students. We graduate students every quarter and not just at the end of the year.

Medical Imaging Technology	201314	201415	201516	201617	201718
Bachelor of Science	160	132	155	146	146
Klamath Falls	129	109	123	119	117
Diagnostic Medical Sonography	28	25	22	28	24
Echocardiography	19	16	20	18	19
Nuclear Med Molecular Imaging	14	14	15	14	13
Radiologic Science	49	40	48	42	48
Vascular Technology	19	14	18	17	13

Employment Rates and Salaries

The data below is not separated out of the degree completion students. However, all the students in the program are employed and salaries range from \$50,000 to \$133,000, with the average at \$60,000. This program has a 98% success rate to finding employment. See [Appendix D](#).

Pass Rates on Board and Licensure Exam

All the degree completion students have passed their licensure exams prior to starting in the

Section 3 – Program Educational Objectives

Program Educational Objectives

Students at the end of this course are able to:

1. Demonstrate diagnostic techniques, use sound judgment and good decision making to provide patient services.
2. Demonstrate great leadership skills in the field of echocardiography technology who contribute to the field on a local, regional or national level.
3. Synthesize and Analyze problems critically, communicate effectively and exemplify professional ethics.
4. Perform at a professional level and as lifelong learners and responsible citizens.

Student Learning Outcomes

- The student will demonstrate the ability to communicate effectively in oral, written and visual forms.
- The student will demonstrate the ability to work effectively in teams.
- The student will demonstrate an ability to provide basic patient care and comfort.
- The student will employ professional judgment and discretion including ethics.
- The student will demonstrate knowledge and understanding of human gross anatomy, sectional anatomy, and normal and abnormal cardioechocardiography anatomy.
- The student will demonstrate knowledge and understanding of cardioechocardiography physiology, pathology, and pathophysiology.
- The student will demonstrate knowledge and understanding of cardioechocardiography physical principles and instrumentation.
- The student will demonstrate knowledge and understanding of clinical cardioechocardiography diagnostic procedures and testing.
- The student will demonstrate an understanding of diverse cultural and humanistic traditions in the global society.
- The student will be able to perform scholarly research and to contribute that knowledge to the field of Echocardiography.

Program Faculty Review

Program Student Learning Outcomes and Objectives were reviewed by program faculty during Fall Convocation Program Assessment Meeting.

Degree Completion Echocardiography Faculty met in the fall of 2018-2019 to review the program. Two courses were eliminated from the program to be in alignment with the on-campus program.

The Degree Completion Echo Faculty met with the advisor board to be able to get feedback in all learning outcomes and discuss the needs of industry. The Advisory Board met in June 2019 where the results of assessment and student learning were discussed. We also conducted a survey of the advisory board members to ask for suggestions on improvements from curriculum design to new programs. The results are shared in this report. The Advisory Board consists of 5 OIT degree completion program graduates who serve the echo and echocardiography degree completion programs. In addition, there are 2 industry leaders that serve on the Board.

Board Members had a lot of thoughts on marketing the program and suggest attention the national meetings this year as an exhibitor. They would like more people to know about the program. Some members were interested in talking about an advanced practice degree but so far this has been thought to be too expensive to launch. Further suggestions will take place at the next meeting in the spring. In addition, they are very interested in having advance practice certificates or degrees available.

Advisory Board Survey Results

The advisory board met in June 2018 and recommended that the program do more marketing and offer more advanced certificates and degrees (doctorate program).

Section 4 – Curriculum Map

Included in the Appendix

Curriculum changes were made to bring the degree completion program in alignment with the on-campus program to match all courses for NWCCU accreditation.

Section 5 – Program Student Learning Outcomes Cycle

Echocardiography Degree Completion Learning Outcomes Assessment Schedule	2018-2019	2019-2020	2020-2021
1. The student will demonstrate the ability to communicate effectively in oral, written and visual forms.		X	
2. The student will demonstrate the ability to work effectively in teams.	X		
3. The student will demonstrate an ability to provide basic patient care and comfort.			X

4. The student will employ professional judgment, and discretion including ethics	X		
5. The student will demonstrate knowledge and understanding of human gross anatomy sectional anatomy and normal and abnormal cardioechocardiography anatomy.		X	
6. The student will demonstrate knowledge and understanding of cardioechocardiography physiology, pathology, and pathophysiology.			X
7. The student will demonstrate knowledge and understanding of cardioechocardiography physical principles and instrumentation.			X
8. The student will demonstrate knowledge and understanding of clinical echocardiography diagnostic procedures and testing.		X	
9. The student will demonstrate an understanding of diverse cultural and humanistic traditions in the global society.	x		
10. The student will be able to perform scholarly research and to contribute that knowledge to the field of echocardiography.		X	

VI. Summary of Assessment Activities

The Echocardiography Degree Completion Program faculty conducted formal assessment of three student learning outcomes during 2018-2019.

Student Learning Outcome#2: The student will demonstrate the ability to work effectively in teams.

The Echocardiography faculty conducted an analysis of where this outcome is reflected in the curriculum. The mapping of this outcome in the Echocardiography curriculum can be found in Appendix A, Student Learning Outcome-Course Matrices Table A1.

For student learning outcome 2, two measurements were conducted on 25 students / employers in ECHO 420A Echo 420B courses during Winter and Spring Terms 2018-2019. Surveys were completed by the students and by their employers to assess the quality of team work they are providing on the job. It should be noted that the students are all board registered and are already professionally employed.

Performance Criteria	Assessment Method	Measurement Scale	Minimum Acceptable Performance	Results
Works Well with Team Members	Employer survey	1- 4 scale	80% at 3 or 4	100%
Communicates Well / Non hostile	Employer survey	1- 4 scale	80% at 3 or 4	100%
Strategy Formulation	Employer survey	1- 4 scale	80% at 3 or 4	100%
Works well with Patients	Employer survey	1- 4 scale	80% at 3 or 4	88%
Trains and Helps Others	Employer survey	1- 4 scale	80% at 3 or 4	88%
Passion for their work	Employer survey	1- 4 scale	80% at 3 or 4	100%
Timely	Employer survey	1- 4 scale	80% at 3 or 4	100%
Honest Integrity Good Attitude	Employer survey	1- 4 scale	80% at 3 or 4	100%
Innovative	Employer survey	1- 4 scale	80% at 3 or 4	100%
Goal Oriented	Employer survey	1- 4 scale	80% at 3 or 4	100%
Systems Monitoring	Employer survey	1- 4 scale	80% at 3 or 4	100%

Table 3: SLO #2: Team Work on the job: Echo 420 A and Echo 420 B

Strengths: Employers ranked the student above expectations in all categories regarding team working skills.

Weakness: This was based on skills in the job setting, faculty want to recheck this in the classroom as well.

As a result of the data, the OIT Echocardiography Degree Completion program faculty decided not to change what we are doing regarding building team working skills into the class assignments. The students in this degree completion program are seasoned workers in the field already and have been working full time before they start this program. It is not surprising that they have good team building skills on the job before even beginning the program. The faculty think we need to evaluate more teamwork skills in the classroom though, to be sure it is proficient in both settings.

Indirect Measure #2 Student Survey

A survey was sent to 25 students in Echo420 A and Echo 420B Winter and Spring Terms 2018-2019 and 25 students returned the survey. The results are shown in Table #4 below.

Performance Criteria	Assessment Method	Measurement Scale	Minimum Acceptable Performance	Results
Works Well with Team Members	Student survey	1- 4 scale	80% at 3 or 4	96%
Communicates Well / Non hostile	Student survey	1- 4 scale	80% at 3 or 4	100%
Strategy Formulation	Student survey	1- 4 scale	80% at 3 or 4	84%
Works well with Patients	Student survey	1- 4 scale	80% at 3 or 4	
Trains and Helps Others	Student survey	1- 4 scale	80% at 3 or 4	100%
Passion for their work	Student survey	1- 4 scale	80% at 3 or 4	80%
Timely	Student survey	1- 4 scale	80% at 3 or 4	92%
Honest / Integrity / Good Attitude	Student survey	1- 4 scale	80% at 3 or 4	100%
Innovative	Student survey	1- 4 scale	80% at 3 or 4	100%
Goal Oriented	Student survey	1- 4 scale	80% at 3 or 4	88%
Systems Monitoring	Student survey	1- 4 scale	80% at 3 or 4	88%

Table 4: SLO #2: Team Work on the job: Echo420 A and Echo 420 B Students self-ranked in all categories

Strengths: Students feel they have good team working skills on the job and they have been working clinically prior to joining this program.

Weaknesses: This survey was done with the job setting in mind. The faculty would like to retest this measure specifically as it relates to classroom work.

As a result of the data, the OIT Echocardiography Degree Completion program faculty decided to continue doing what we are doing as we have good results with team work among the students. The faculty discussed measuring teams with different assignments to test this skill in a few ways.

B. Student Learning Outcome #4: The student will employ professional judgment, and discretion including ethics.

The Echocardiography Degree Completion Program faculty conducted an analysis of where this outcome is reflected in the curriculum. The mapping of this outcome in the Echocardiography curriculum can be found in Appendix A, Student Learning Outcome-Course Matrices Table A2.

Direct Measure #1

The students in Echo 420A and Echo420B were new to the program. During winter and spring quarters 2018-2019 there were 25 new students who completed case studies.. The students were required to apply what they had learned in previous course work to actual case studies. The students were asked to support their arguments with material from their reading and the discussion section of the class. A grading rubric was used to assess the students' work. The following 6 areas were measured in the grading rubric. 1) the ability to perform the tasks and roles required (competency), 2) integrating all data, 3) attention to detail- attending to fine detail (which included writing skills) 4) seeing the whole- getting the bigger picture, 5) developing expertise, 6) problem solving using logic and reasoning (see Table 5 below).

Performance Criteria	Assessment Method	Measurement Scale	Minimum Acceptable Performance	Results
the ability to perform the tasks and roles required (competency)	Grading Rubric	1- 4 scale	80% at 3 or 4	100%
integrating all data	Grading Rubric	1- 4 scale	80% at 3 or 4	100%
attention to detail- attending to fine detail	Grading Rubric	1- 4 scale	80% at 3 or 4	100%
seeing the whole- getting the bigger picture,	Grading Rubric	1- 4 scale	80% at 3 or 4	82%
developing expertise,	Grading Rubric	1- 4 scale	80% at 3 or 4	92%
problem solving using logic and reasoning	Grading Rubric	1- 4 scale	80% at 3 or 4	100%

Table 5: SLO #4: Professional Judgment: Echo 420A and Echo420B Winter and Spring Terms

Strengths: The students either met benchmark or surpassed it in terms of their professional judgement, discretion and ethical standards on clinical cases.

Weakness: None

As a result of the data, the OIT Echocardiography Degree Completion program faculty feel students do a good job on deciding the facts of the and employ professional judgement, discretion and ethical standards. These are students who have already been working in the field for some time before they start this program. They are already experienced on clinical cases.

Direct Measure #2

The students in Echo 385 Echo Lab Management were new to the program. During winter and spring quarters 2018-2019 there were 13 new students who completed the final projects. A grading rubric was used on a complex final project. The following 6 areas were measured in the student survey. 1) the ability to perform the tasks and roles required (competency), 2) integrating all data, 3) attention to detail- attending to fine detail (which included writing skills) 4) seeing the whole- getting the bigger picture, 5) developing expertise, 6) problem solving using logic and reasoning (see Table 6 below).

Performance Criteria	Assessment Method	Measurement Scale	Minimum Acceptable Performance	Results
the ability to perform the tasks and roles required (competency)	Grading Rubric	1- 4 scale	80% at 3 or 4	100%
integrating all data	Grading Rubric	1- 4 scale	80% at 3 or 4	100%
attention to detail attending to fine detail	Grading Rubric	1- 4 scale	80% at 3 or 4	84%
seeing the whole- getting the bigger picture,	Grading Rubric	1- 4 scale	80% at 3 or 4	92%
developing expertise,	Grading Rubric	1- 4 scale	80% at 3 or 4	100%
problem solving using logic and reasoning	Grading Rubric	1- 4 scale	80% at 3 or 4	100%

Table 6: SLO #4: Professional Judgment: Echo 385

Strengths: Students completed a complex final project which involved interviewing, research and studying their textbook and either met or surpassed the benchmark to show that they have good professional judgement and ethical decision skills.

Weakness: None

As a result of the data, the OIT Echocardiography Degree Completion program faculty decided the students are good at professional development. Faculty discussed how to measure this again with different assignments in the future. It does really help that these students are already working clinical jobs and are experienced in the field before starting this program. We know from past assessments when students self rate their professional judgement skill, that they rate it very high.

C: Student Learning Outcome #9: The student will demonstrate an understanding of diverse cultural and humanistic traditions in the global society.

The Echocardiography Degree Completion faculty conducted an analysis of where this outcome is reflected in the curriculum. The mapping of this outcome in the Echocardiograph curriculum can be found in Appendix A, Student Learning Outcome-Course Matrices Table A3.

Direct Measure #1

The faculty assessed this outcome in Echo 385 on 13 students during Winter and Spring quarters 2018-2019 using a cultural awareness assignment and grading rubric. The faculty rated the proficiency of students using the performance criteria described in Table #7 below.

Performance Criteria	Assessment Method	Measurement Scale	Minimum Acceptable Performance	Results
Appropriately works to gather patient history from patients from diverse backgrounds	Grading Rubric	1- 4 scale	80% at 3 or 4	100%
Avoids demonstration of prejudice	Grading Rubric	1- 4 scale	80% at 3 or 4	100%
Recognizes different cultures and traditions in medicine	Grading Rubric	1- 4 scale	80% at 3 or 4	100%
Recognize how cultural differences can influence hiring practices	Grading Rubric	1- 4 scale	80% at 3 or 4	100%

Table 7: Cultural Competency Echo 385 2018-2019

Strengths: Students completed a cultural competency assignment and either met or surpassed the benchmark to show that they have good skills in this area are appear to be culturally competent.

Weakness: The weakness on this assessment is that it does not show an in-depth measurement as it is based just on one assignment and really to measure this it should be done on a bigger scale.

Improvement: The faculty discussed how to measure retention, diversity gaps and graduation rates across all cultural groups and socio-economic groups to look at the equity gaps. This will be a better sense of diversity issues related to courses taught in this program. Using a combination of IR data and assessment of student work together will give faculty a better look at diversity issues.

VII. Evidence of Student Learning

During the 2018-2019 academic year, the Echocardiography Degree Completion faculty formally assessed the student learning outcomes summarized below. The results of this year's assessment were discussed with the Department Chair and Department Assessment Coordinator in June, 2019.

Student Learning Outcome#2: The student will demonstrate the ability to work effectively in teams.

The purpose of this assessment was to determine if students feel they have good team working skills and if their employers think they are good team members as well.

Strengths: Employers ranked the student above expectations in all categories regarding team working skills.

Weakness: This was based on skills in the job setting, faculty want to recheck this in the classroom as well. As a result of the data, the OIT Echocardiography Degree Completion program faculty decided not to change what we are doing regarding building team working skills into the class assignments. The students in this degree completion program are seasoned workers in the field already and have been working full time before they start this program. It is not surprising that they have good team building skills on the job before even beginning the program. The faculty think we need to evaluate more teamwork skills in the classroom though, to be sure it is proficient in both settings.

Strengths: Students feel they have good team working skills on the job and they have been working clinically prior to joining this program.

Weaknesses: This survey was done with the job setting in mind. The faculty would like to retest this measure specifically as it relates to classroom work.

As a result of the data, the OIT Echocardiography Degree Completion program faculty decided to continue doing what we are doing as we have good results with team work among the students. The faculty discussed measuring teams with different assignments to test this skill in a few ways.

Student Learning Outcome #4: The student will employ professional judgment, and discretion including ethics.

The purpose of this assessment was to determine if students are using professional judgment and discretion including ethics.

Strengths: The students either met benchmark or surpassed it in terms of their professional judgement, discretion and ethical standards on clinical cases.

Weakness: None

As a result of the data, the OIT Echocardiography Degree Completion program faculty feel students do a good job on deciding the facts of the and employ professional judgement, discretion and ethical standards. These are students who have already been working in the field for some time before they start this program. They are already experienced on clinical cases.

Strengths: Students completed a complex final project which involved interviewing, research and studying their textbook and either met or surpassed the benchmark to show that they have good professional judgement and ethical decision skills.

Weakness: None

As a result of the data, the OIT Echocardiography Degree Completion program faculty decided the students are good at professional development. Faculty discussed how to measure this again with different assignments in the future. It does really help that these students are already working clinical jobs and are experienced in the field before starting this program. We know from past assessments when students self rate their professional judgement skill, that they rate it very high.

Student Learning Outcome #9: The student will demonstrate an understanding of diverse cultural and humanistic traditions in the global society.

The purpose of this assessment was to determine if students have an understanding of diverse cultural and humanistic traditions in the global society based on an assignment in the lab management course.

Strengths: Students completed a cultural competency assignment and either met or surpassed the benchmark to show that they have good skills in this area are appear to be culturally competent.

Weakness: The weakness on this assessment is that it does not show an in-depth measurement as it is based just on one assignment and really to measure this it should be done on a bigger scale.

Improvement: The faculty discussed how to measure retention, diversity gaps and graduation rates across all cultural groups and socio-economic groups to look at the equity gaps. This will be a better sense of diversity issues related to courses taught in this program. Using a combination of IR data and assessment of student work together will give faculty a better look at diversity issues.

Results of Student Surveys

71% of the students rate their education at OIT as 5/5 and 29% as 4/5. The students describe many meaningful ways they received their education. Many said, "they love research" now as a result of their experience at OIT. Many students report wanting to move into management positions and many are going on to graduate school. 64% of the students are highly proficient in the ESLOs. Most of the students came to the program because of its good reputation.

Student Quotes from the Exit Survey

"What have been the three best things about your major? These might be experiences, particular courses or professors, general characteristics or features of the program--anything at all that was important to you."

"I was able to see a different aspect of the work I currently do. I was able to observe other modalities as they pertain to scans and procedures I do."

"I appreciate the care of the majority of the professors. Dr. Isaacson and Dr. Lancaster were excellent teachers and she provided encouragement and critiques throughout my time at OIT."

Beside all major related courses my favorites were echo lab management, healthcare management, education and leadership, these are courses the two year programs do not offer and they are very helpful for thinking outside of the box. I have also enjoyed discussion boards and talking to colleges, been able to realize our diversity and share our common interest was amazing aspect of this course. And one thing I will miss when I graduate in few weeks is the database access."

"The management courses have been helpful and I am thankful they were required in the echo program. The echo courses have allowed me to grow in my knowledge in Echocardiography. Dr. Issacson has been a great resource in all of my courses and giving guidance. She is encouraging and gives effect feedback."

"1. Gaining knowledge about diseases of the heart, and diseases that can cause heart issues. 2. having classes that go into the other sonography fields such as vascular and abdominal."

I really like the required observation project, that really is an eye opener. I hated reading everybody's post, yet I learned so much from their own observation."

"1. flexibility 2. caring and supportive professors 3. course materials are relevant to the field of practice,"

Results of Board Member Surveys

Board members want to see OIT exhibit at the national meetings and to market more. Board members want to see more advanced practices taught in the form of advanced practitioner degrees or certificates.

VIII. Evidence of Improvement in Student Learning

- Two courses were eliminated to better align with the oncampus program for accreditation purposes.

- Even though students met the benchmark on each assessment, we think we need to measure equity gaps across racial groups and low socio-economic groups to see where gaps are in this program.
- More APA coaching and examples are given for students who have not been in school for a long time and who have English as a second language.

IX. Data-driven Action Plans: Changes Resulting from Assessment

Faculty agreed that to measure teamwork, professional judgment and cultural awareness that it will take more than one assessment on a single assignment. All of these topics are big and have many nuisances to them. The faculty agree to reassess changing up assignments and rubrics to get a better sense of how students are doing. It may be helpful to survey students more as well. In addition, we need more student participating in the student exit surveys (survey results are in the appendix). Faculty want to add IR data on equity gaps across racial groups and low socio-economic groups to get a better idea of equity issues in this program. We also have a lot of students with English as a second language and we need to develop more tutoring support for them as they move through the program.

Appendix A1

Curriculum Map for Echocardiography Degree Completion Program

SLO: 2 The student will demonstrate the ability to work effectively in teams.

Courses that are shaded below indicate that the SLO is taught in the course, students demonstrate skills or knowledge in the SLO, and students receive feedback on their performance on the SLO. 4	Faculty help you understand how what you are learning could be applied	63.64% 7	36.36% 4	0.00% 0	0.00% 0	11
5	Faculty help you develop intellectually	72.73% 8	27.27% 3	0.00% 0	0.00% 0	11
6	Faculty make courses interesting	54.55% 6	45.45% 5	0.00% 0	0.00% 0	11
7	Faculty make courses relevant	36.36% 4	63.64% 7	0.00% 0	0.00% 0	11

Q BECO 11 - Please provide feedback about how useful the following Oregon Tech services have been to you.

#	Question	Very useful		Useful		Somewhat useful		Not useful		Total
1	Library	54.55%	6	18.18%	2	27.27%	3	0.00%	0	11
2	Registrar's Office	63.64%	7	27.27%	3	9.09%	1	0.00%	0	11
3	Financial Aid	60.00%	6	30.00%	3	10.00%	1	0.00%	0	10

Q BECO 12 - Do you feel you are now a life long learner since you completed your degree?

Do you feel you are now a life long learner since you completed your degree?

No

Yes

Yes

I plan to pursue my Master's degree

Absolutely!

This program has allowed me the motivation to continue on for a master's degree

Yes

yes

Yes, planning on going for my Master's in PA

Yes, I am looking forward to Master's Degree completion next.

Q BECO 13 - Has your confidence grown in yourself since completing your degree? If so, please explain.

Has your confidence grown in yourself since completing your degree? If so, please explain.

It has. I feel more confident in my oral and written communication.

Yes. I feel I am now more prepared to become a manager

I have a broader knowledge in management.

Education plays a major role in confidence.

I am confident in my learning abilities and skills since doing online classes

Some what, I felt like I have accomplished an important step towards my learning, I feel with this degree I can do things I was not able to do, Such as maintain higher degree or compete to some positions, improve chances of survival of being life long learner in Academic way. I understand we do learn in so many ways however, Academic learning have a distinctive remarks.

The courses have allowed me to grow in my professional development and have more confidence.

To some extent yes. It has help me know that if I get out there and get busy I can be a great sonographer.

yes. It feels good to have finished what I started!

Yes, I had observation on open heart surgeries which omg opened up my perspective in my field even more.

Absolutely.

Q BECO 14 - Do you feel you could contribute to the advancing of the field or your work environment in new ways with all that you have learned in your degree?

Do you feel you could contribute to the advancing of the field or your work environment in new ways with all that you have learned in your degree?

Yes.

Yes is do. My goal is to go into supervision/management and this was very helpful for my future.

Yes.

I actually love doing research and OIT has helped me become a better researcher and writer.

Certainly! I have more of a solid knowledge, in many aspects of my job that I have learned through this courses, despite my clinical background some courses added so much to me such as echo lab management, healthcare management, education and leadership

Yes

yes

Yes, I already am working in research.

Yes

I do and I am employing the knowledge gained already in my work environment.

Q BECO 15 - Has your degree given you greater opportunity in your career? If yes, please explain.

Has your degree given you greater opportunity in your career? If yes, please explain.

It has. I will no attempt to apply to a PA school.

Yes because by obtaining my degree I now am able to apply for a supervisor position at the facility I currently work at.

The classes I took have helped me in my current field of study

Not sure yet. I guess once I maintain my degree and added to my Resume, I can tell

I have already been promoted to the manager of my echo lab.

Yes, promotions and an ability to apply for a master degree.

I think the facility you work for aids in growing in this field.

Yes, I will be teaching echocardiography courses and providing more administrative support at work.

Q BECO 16 - What have been the three best things about your major? These might be experiences, particular courses or professors, general characteristics or features of the program-- anything at all that was important to you.

I was able to see a different aspect of the work I currently do. I was able to observe other modalities as they pertain to scans and procedures I do.

I appreciate the care of the majority of the professors. Dr. Isaacson and Dr. Lancaster were excellent teachers and she provided encouragement and critiques throughout my time at OIT.

beside all major related courses my favorites were echo lab management, healthcare management, education and leadership, these are courses the two year programs do not offer and they are very helpful for thinking outside of the box. I have also enjoyed discussion boards and talking to colleges, been able to realize our diversity and share our common interest was amazing aspect of this course. And one thing I will miss when I graduate in few weeks is the database access.

The management courses have been helpful and I am thankful they were required in the echo program. The echo courses have allowed me to grow in my knowledge in Echocardiography. Dr. Isaacson has been a great resource in all of my courses and giving guidance. She is encouraging and gives effect feedback.

1. Gaining knowledge about diseases of the heart, and diseases that can cause heart issues. 2. having classes that go into the other sonography fields such as vascular and abdominal.

I really like the required observation project, that really is an eye opener. I hated reading everybody's post, yet I learned so much from their own observation.

1. flexibility 2. caring and supportive professors 3. course materials are relevant to the field of practice

Q BECO 17 - What is your overall rating of the education you received at Oregon Tech?

#	Answer	%	Count
1	1	0.00%	0
2	2	0.00%	0
3	3	0.00%	0
4	4	28.57%	2
5	5	71.43%	5
	Total	100%	7

Q BECO 18 - Do you have any other comments about your time at Oregon Tech?

Do you have any other comments about your time at Oregon Tech?

I wish the graduation procedure would have been explained more thoroughly

I admired many aspects of the school and the program. And I am proud to be able to graduate in few weeks. I would suggest some areas of improvement may be to echo degree completion. i could not make connection between between the Trigonometry course this program require and my entire learning towards the degree. I cant see how it will help me on my career, I do believe statistics course would have been more relevant , applicable and easy to do for many adults coming back to school after few years. I strongly recommend the change of this course not because of devaluing it as a math course but because, it may be challenging while irrelevant and definitely statistics following Algebra will relate more to our degree, and real life application for echocardiographers such as scheduling, research, surveys and so on. Thank you so much for this opportunity!

This is has been one of the greatest experiences I have had and thankful for the opportunity to attend OIT.

I think the Trigonometry course is not necessary in finishing a bachelor degree of echocardiography. It has nothing to do with the course, an upper division physics or statistics course would be a much better choice of a math course because you use that ALL the time in echocardiography.

I did learn some stuff that I never knew I can use for another purpose in the exam.

I really enjoyed my time at OIT. I will be considering OIT in the future for graduate programs.

Q Experiential Learning 1 - Oregon Tech recognizes that learning occurs in a variety of venues and experiences. Please check all of the following learning experiences you participated in while enrolled as a student at Oregon Tech.

#	Answer	%	Count
1	Internship / Externship / Clinical / Practicum	25.00%	4
13	Research with a faculty member	6.25%	1
12	Course project with industry or community partnership	12.50%	2
10	Capstone Project / Senior Project	25.00%	4

Q Experiential Learning 2 - Please tell us more about your Internship / Externship / Clinical / Practicum.

Name of company or organization:	Brief description of experience:	What term(s) did you participate:	Duration in weeks:	Average hours per week:
Tawam Hospital	For my echo externship courses	two terms	20 weeks	37 hours
UAB	Did externship at UAB	Fall 2017 and Spring 2018	12	10
Fairfield Medical Center	Interventional procedures, surgery, and non-invasive imaging/testing	Spring and Summer 2018	18 weeks	10 hours/week

Q Experiential Learning 3 - Please tell us more about your research with a faculty member.

Name of faculty member:	Brief description of experience:	What term(s) did you participate:	Duration in weeks:	Average hours per week:
Shirley Johnson	It was a writing project, I have learned so much from Dr. Shirley and definitely my research and project management skills has come a long way. she is amazingly supportive and encouraging	Winter, 2019	10	8-10

Q Experiential Learning 4 - Please tell us more about your course project with industry or community partnership.

Name of company or organization:	Brief description of experience:	What term(s) did you participate:	Duration in weeks:	Average hours per week:
community, work	intercultural communication course project	Summer, 2018	it is all the time I have spent here being overseas and working at a multi cultural companies	couple of events with different culture interactions

Q Experiential Learning 5 - Please tell us more about your capstone project or senior project.

Name of company or organization:	Brief description of experience:	What term(s) did you participate:	Duration in weeks:	Average hours per week:
Duke university hospital and Utah university hospital	Interviews about my LVAD Senior project	Spring, 2019	the course duration is 10 weeks of extensive research but my interaction with these institution is limited to interviews of experts	I invest about 15-20 hours per week on my research in general
Fairfield Medical Center	Cardiac research project	Fall 2018	10 weeks	10 hours/week

Q Experiential Learning 6 - Please tell us more about your volunteer experience.

Name of company or organization:

Q Experiential Learning 7 - Please select all of the student clubs and/or programs you participated in while at Oregon Tech:

#	Answer	%	Count
1	ALPS - Philosophy / Poetry Club	0.00%	0
2	Amateur Radio Club	0.00%	0
