Ethics Certificate

Oregon TECH
Oregon Institute of Technology

Advantage

Obtaining the Ethics Certificate gives students an advantage in securing employment in professions where ethics is a core component, such as healthcare, business, and engineering.

Completing the Certificate also gives an advantage to students who will be applying to graduate programs by providing them with a more robust and extensive background of academic achievement.

Prepare for the ethical challenges that all professions present!

The Applied Ethics Certificate program at Oregon Tech provides students with advanced ethical reasoning skills — "soft skills" that are highly valued by employers across the professions. This certificate shows you are prepared for the ethical challenges that your profession will present.

By offering a variety of elective courses from multiple areas, the program is designed to be customizable and complimentary to your major, career path, and goals.

In association with the Arts, Literature, and Philosophy (ALPs) Program.

Ethics Certificate

Oregon TECH
Oregon Institute of Technology

Curriculum

The Applied Ethics Certificate requires two core Philosophy courses and four electives, some of which might be courses in your chosen major, which means you could already be on your way to completing this certificate!

Elective courses in the program can be found across the following academic areas:

- Anthropology
- Biology
- Business
- Civil Engineering
- Communications
- Environmental Science
- History
- Humanities
- Literature
- Philosophy
- Sociology

This program is available face to face, online, and in mixed modality.
